

European HTA

What have we learned, what lies ahead?

Free Webinar on 4th of May 2022

The political decision-makers in the European Union (EU) are in agreement: from 2025, the EU member states are to prepare joint health technology assessments (HTAs).

Join us as we share our experiences and learnings from EUnetHTA Joint Assessment projects and discover, how you can best prepare for the upcoming mandatory EU HTA!

13:00-13:05

Welcome (*AMS*)

13:05-13:20

Introduction/EU HTA Regulation (Matias Olsen, EUCOPE)

- EUCOPE activities
- How to shape EU HTA requirements during transition period?

13:20-13:35

First Steps from 2022 on: What does this mean in practice (with focus on Germany)? (*AMS*)

- Involvement of Germany (G-BA & IQWiG) in the EU HTA process
- European scientific advice
- Transition period: National and EU HTA in parallel?

13:35-13:50

Hands on experience from 2 Joint Assessments in JA3 (chronic and orphan diseases) (*AMS*)

- Experience regarding process and timelines (e.g. activities during scoping and assessment phase)
- Content of Joint Clinical Assessment vs. German AMNOG-Dossier
- Opportunity of EU HTA (e.g. scoping meeting, patient and academic society involvement, surrogate endpoints, comparators)
- Preparation for EU HTA based on *AMS* experience from both, Joint Assessments and AMNOG process

13:50-14:00

Questions, final discussion and farewell

Event Details

Since the political institutions in the European Union (EU) reached a provisional agreement in June 2021, it is set in stone that the Regulation on European health technology assessments (HTA) will be implemented starting in 2025. Meanwhile, the EU Member States are getting ready to prepare Joint Clinical Assessments (JCA) of health technologies thenceforth.

In order to further advance the procedural and methodological basis for these JCA, the EU signed a two-year contract with the EUnetHTA 21 consortium. The work of EUnetHTA 21 will explicitly build on the methods and deliverables already implemented in the previous EUnetHTA Joint Actions and will focus on establishing standards for the upcoming EU HTA system defined by the HTA Regulation.

We would like to give you an insight into our experiences from EUnetHTA Joint Action projects and provide you with inspirations on how to best prepare for the upcoming mandatory EU HTA.

Speakers

- **Matias Olsen**, Public Affairs & Policy Manager, EUCOPE
- **Dr. rer. nat. Karolin Eberle**, HTA Expert, AMS Advanced Medical Services
- **Dr. rer. nat. Annette Fasan**, HTA Expert, AMS Advanced Medical Services
